Continuation of 3. NOTE: Amendment to claim 1 presents new issues not previously considered in at least dependent claims 6 and 32 having further limitations of the flattening layer.

Continuation of 11. does NOT place the application in condition for allowance because: Arguments regarding the patentability of currently presented claim 1 have been considered but are not persuasive. Furusawa discloses the layer 20 as including both layers 120 and 121 protecting the thin film transistor. Protection from ultraviolet light is further desirable to protect the display during photolithographic manufacturing processes and environmental and ambient light.
